COLBERT DOMESTIC WELL SAMPLING COMMITTEE
February 3, 1993

(b) (6)

Scott Fink
Bill Wedlake

The Committee reviewed the December sample results from Laucks Testing Laboratory. Other than the slow turn-around time, results were as expected.

(b) (6) noted that there are 2 new wells in the area that need to be placed on the sampling schedule. She will be providing the County with the residents names and phone numbers.

Copies of the 1993 annual sampling plan were distributed for review. At the next meeting the Committee will evaluate the plan well by well to assure compliance with our sampling criteria.

Dean Fowler updated the committee on the remedial action activities including construction of extraction wells and pipe lines.

Bill is in the process of compiling a new well location map that will include domestic, monitoring and extraction wells.

NEXT MEETING: The next meeting will be scheduled after the new map has been completed.
